DVS HITESH

+91 6305002837 hiteshdindukurthi@gmail.com www.linkedin.com/in/hitesh-dvs

CAREER OBJECTIVE

Motivated Software Engineer with strong programming and problem-solving skills. Skilled in multiple languages and focused on building reliable, efficient, and scalable solutions. Committed to continuous learning, teamwork, and delivering impactful results.

EDUCATION

ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES — **TIRUPATI,INDIA**
- Bachelor of Technology - Electronics and Communication Engineering — 2026

SRI CHAITANYA JUNIOR COLLEGE — **TIRUPATI,INDIA**
- Intermediate - Mathematics, Physics, Chemistry — 2022

LITTLE ANGELS HIGH SCHOOL — **TIRUPATI,INDIA**
- Matriculation (CBSE) — 2020

SKILLS SUMMARY

WEB TECHNOLOGIES
- HTML
- CSS
- Bootstrap

LANGUAGES
- Python
- C
- Java

SOFTWARE & VERSION CONTROL
- Visual Studio Code
- GitHub
- IntelliJ IDEA
- MATLAB

DATABASES
- Oracle SQL

PROJECTS

EDUTUTOR AI - AN AI-POWERED TUTORING ASSISTANT | ***Tech*** *: Python, IBM watsonx.ai*
GitHub: https://github.com/hitesh747/EduTutor_AI

- Gained hands-on experience in LLM fine-tuning, prompt engineering, and AI model deployment.
- Built an AI-powered personalized learning system that generates human-like responses.

UNESCO WORLD HERITAGE ANALYTICS DASHBOARD | ***Tech*** *: Tableau, MS Excel*
GitHub: https://github.com/hitesh747/World-Heritage-Treasures

- Developed an interactive Tableau dashboard to visualize UNESCO World Heritage Sites data.
- Implemented dynamic dashboards, geographic visualizations, and data-driven insights, enabling users to explore heritage site distributions, endangered site status, and regional trends efficiently.

EMOTUNE - MOOD-BASED MUSIC RECOMMENDATION | ***Tech*** *: Python, ML, YouTube API, Frontend*
GitHub: https://github.com/hitesh747/TuneMyMood

- Developed a web application that detects a user's facial emotion from photo or webcam input and curates music recommendations tailored to the detected mood.
- Integrated machine learning models for real-time emotion analysis and dynamically generated playlists using YouTube API.
- Designed an intuitive, responsive interface for easy photo uploads, live webcam detection, and personalized song browsing.

INTERNSHIPS

GENERATIVE AI INTERN | SmartBridge, APSCHE (05/2025) - (06/2025)

- Gained hands-on experience in LLM fine-tuning, prompt engineering, and AI model deployment.
- Worked with IBM Watsonx.ai and Granite models for building AI-based applications.
- Developed an AI-powered tutoring platform that provides personalized learning support to students.

ARTIFICIAL INTELLIGENCE INTERN | Infosys Springboard (08/2025) - (09/2025)

- Contributing to problem-solving activities and real-world AI use cases under structured mentorship.
- Supporting in the development of basic AI/ML models and learning best practices in data preprocessing and model evaluation.
- Collaborating in a virtual team-based environment, enhancing problem-solving and analytical skills.

CERTIFICATIONS

- **The Complete Java Development Bootcamp** - Udemy
- **Google Cloud Computing Foundations Certificate** — Knowledge of cloud computing, infrastructure, and cloud-native applications.
- **Generative AI** - LinkedIn Learning
- **Java Full Stack** - Wipro TalentNext
- **Cloud Computing on AWS** - Udemy
- **Python Mastering the Essentials** - Scaler
- **Agentforce Champion Rank (Salesforce Trailhead)**

ACHIEVEMENTS

- **Crack the Code** - Awarded first prize for exceptional problem-solving and coding skills in a competitive programming challenge.
- **PowerPoint Presentation** - Received a Consolation prize for presenting “Blue Eyes Technology” at TRISHNA 2K24, showcasing human-computer interaction advancements.
- **Arts & Crafts** - Achieved first prize for creating a Mosaic craft promoting beautiful India hosted by IETE forum.
- **Video Editing** - Secured first place in a competition hosted by AITS TPT for creating a video on India’s Space achievements, presented on National space day.
